

Medical Devices

Ophthalmic use	Balanced sterile saline solution	Solution for irrigation	For intraocular irrigation	Glass Bottles and Plastic Bags	25ml, 250ml, 500ml
				Plastic bags	500ml
	Enriched balanced saline solution, sterile	Solution for irrigation	Used for surgical intraocular irrigation	Glass bottle and plastic vial	500ml + 25ml
Organ preservation and Cardioplegia	Modified sterile Bretschneider solution	Solution for Perfusion and Organ preservation	Used in cardioplegia (multi-organ protective washing) during cardiac surgery and for protection in case of ischemia. Washing and preservation of the organs during the transplant.	Plastic bags	1000ml, 1500ml, 2000ml
Respiratory System	Sterile water for inhalation	Solution for inhalation	Used to humidify higher site of the respiratory system	Plastic bags	1000ml, 2000ml
Urological use and wounds cleansing	Water for irrigation	Solution for irrigation	Used in the urological practice and the medical surgical practice	Plastic bags	1000ml, 2000ml, 3000ml, 5000ml, 6000ml, 10000ml
	Sodium chloride 0.9%	Solution for irrigation	Used during irrigation of "organs" and catheters, postoperative bladder irrigation and for cleansing of cutaneous wounds or mucosa	Plastic bags	50ml, 100ml, 250ml, 500ml, 1000ml, 2000ml, 3000ml, 5000ml, 10000ml
	Mannitol 0,54% and Sorbitol 2,7%	Solution for irrigation	Used for urological irrigation, for cytoscopic and endoscopic use in the urological practice.	Plastic bags	3000ml, 5000ml
	Glycine 1,5%	Solution for irrigation	Urological use during surgical operations, urological use in the irrigational catheteres	Plastic bags	3000ml, 5000ml
	Glycine 1% Mannitol 1%	Solution for irrigation	Used for urological irrigation, for cytoscopic and endoscopic test in the urological practice,	Plastic bags	3000ml, 5000ml
	Solution R	Solution for irrigation	Solution for irrigation, used in case of urinary way calculosys, as cleansing liquid in case of urethral or suprapubic catheter and in order to fight or prevent phosphate precipitates in the urine or in the catheters.	Plastic bags	50ml, 100ml
Used in dialysis	Solution G	Solution for irrigation	Used in cases of urinary way calculosys, as cleansing liquid in case of urethral or suprapubic catheter and in order to fight or prevent phosphate precipitates in the urine or in the catheters	Plastic bags	50ml, 100ml
	Sodium chloride 0,9% for the sterile extracorporeal rinsing	Solution for extracorporeal rinsing	Used for washing of arterio-venous lines in dialysis equipment.	Plastic bags	1000ml, 2000ml, 3000ml, 5000ml
	Two bags-kits of sodium chloride 0,9%	Solution for extracorporeal rinsing	Used for rinsing of the artero-venous in the dialysis devices	Two plastic bags kits	1500ml + 500ml, 2000ml + 500ml, 2000ml + 1000ml
	Concentrated acid solutions for bicarbonate dialysis	Solution for hemodialysis	Concentrations comply with the European Pharmacopoeia current edition	Jerry can	Variable Volume
	Concentrated basic solutions for bicarbonate dialysis	Solution for hemodialysis	Concentrations comply with the European Pharmacopoeia current edition	Jerry can	
Concentrated solution for hemodialysis with acetate	Solution for hemodialysis	Concentrations comply with the European Pharmacopoeia current edition	Jerry can	Variable Volume
